

MOODLE DEVCAMP

MOODLE DEVCAMP FROM JUNE 30 - JULY 1, 2015

On June 30th and July 1st the first Moodle Devcamp taking place in Vienna will be organised by the Academic Moodle Cooperation and Moodlerooms: the world's most influential Moodle partner. Software developers and other users interested in improving and developing their Moodle learning platform for day to day practice are invited to participate.

During this two-day workshop, hosted by the University of Vienna, Moodle enthusiasts – ranging from guru to newbie – will meet to share their ideas about various themes and possible improvements with regards to user interface, mobile solutions, academic tools and implementation.

The workshop will have an open format. The group with the best, most forward-looking results will receive an award from our jury of experts.

Attendance is free of charge. Register now at moodledevcamp.org.
